## SHOW GARDEN ROYAL HOSPITAL WAY 37 WALWORTH GARDEN FARM

### Rooftop Workplace of Tomorrow

**Rooftop Workplace of Tomorrow** makes use of vacant urban rooftop space to extend the office outdoors. The garden offers an innovative and thought-provoking working environment.

Individuals can sit in contemporary hanging chairs and network using a smartphone or tablet. Conferences can be held within the lounge area under the weatherproof canopy. This area has a 3m x 3m video/projection screen that projects sound and visuals, and is surrounded by beautiful planting (including a pick your own herbal tea bar). The planting is understated and offers a calm, tranquil backdrop to an otherwise stark cityscape. Silvers, blues and greens combine in a variety of textures, with a smattering of white flowers. The cube building has been provided by Easy Home/Hot Springs, the technology by Toshiba UK, the bamboo decking and Richlite surfaces by CF Anderson and the furniture by Thomas Bramwell.

This garden challenges our perception of workplaces and offers inspirational ideas for the future.
