Aralia Garden Design—Cover Imagery

Aralia Garden Design LLP (www.aralia.org.uk) is an award-winning exterior design practice, based in the UK, tackling projects of any scale from design through to construction. The team is headed by Patricia Fox.

The image on the cover of the Rooftop Workplace of Tomorrow, has been a critically acclaimed, much photographed, award winning design at the Royal Horticultural Society's Chelsea Flower Show 2012. Designed entirely using Vectorworks Landmark, 'Rooftop Workplace of Tomorrow' is an extension of the working office and utilises unused urban rooftop space, turning it into a haven of relaxation that inspires and provides a thought provoking working environment, in the midst of a concrete jungle. Patricia's visionary design is a fusion of aesthetic, sustainable beauty and hi-tech utilitarianism. Patricia hopes to inspire anyone to extend their working offices into the outdoors, to help those busy workers of the 21st Century stay fresh and revitalised. She also aims to encourage people to 'green up' their rooftop and outdoor spaces whether it's commercial or domestic, to turn it into an inspiring, beautiful yet functional space filled with lush planting to help sustain the environment.
